

Wesley M. Coble, Architect & Planner, Raleigh, N. C.

We have had thirty years experience in repair and replacement of roofing systems on publicly funded projects. We have always had a special interest in projects involving roof replacement because it allows us to research roofing technology to the extent that is not always possible during the design of a new building. We also enjoy the challenge of trying to understand the forces that cause roofing systems to fail.

We have served as designers for a number of publicly funded projects involving roof replacement. These include a wide variety of roofing materials:

built-up roofing systems	fiberglass shingles
flat lock seam metal roofing systems	pre-engineered metal roofing systems
fully adhered single ply membrane roofing systems	balasted single ply membrane roofing systems
standing seam metal roofing systems	slate shingles

Here are some of the roofing projects that we have provided architectural services:

- Roof Repairs, Old Johnston County Health Department Building, Smithfield
- North Carolina Department of Transportation, Division of Motor Vehicles, Roof and Masonry Repairs for Motor Vehicles Building, Raleigh
- Roof Repairs, Johnston County Mental Health Center, Smithfield
- Roof Repairs, Carter-Finley Stadium, N. C. State University, Raleigh
- North Carolina Department of Administration, Roof Repairs, Old Health Building, Raleigh
- North Carolina Department of Administration, Roof Repairs to Buildings 3, 4, 7, 12 and 16, Garner Road Complex, Raleigh
- North Carolina Department of Human Resources, Roof Repairs to Lineberry Hall, Governor Morehead School, Raleigh
- North Carolina Employment Security Commission, Roof Repairs to Buildings A, B, C, D, E and J, Kendall Complex, Raleigh
- North Carolina Department of Administration, Old Health Porch Roof Repairs, Raleigh
- North Carolina Employment Security Commission, Roof Repairs to Buildings G and H, Kendall Complex, Raleigh
- North Carolina State Fair, Roof Repairs to Kelly Building, Raleigh
- North Carolina Highway Patrol Training Center, Roof Repairs, Garner Road Complex, Raleigh

All of these projects have been interesting and we are not aware of any problems associated with any of these roofs.
